Element Bits Description		Description	
Packet Codes	2	2/611: Invalid/Reserved (for Timestamp, format TBD).	
1 (1010)		2.b01: Start of Packet: {new, &TCB}	
		2'b10: End of Packet: {application class, service policy index}	
		2'b00: Invalid/Reserved.	
New Connection	1	Logic 1 indicates a newly established connection; Logic 0 indicates a "CAM Hit" on a currently active connection	
Reserved	as needed	-	
&TCB:	24	Pointer to a Flow TCB or a Client TCB or a RST/DRP/IGN pointer.	
Generaum Count	8	Number of times this &TCB has been recycled.	
Application Class	7	Application Class field from Service Lookaside CAM.	
Service Policy Index	16	Service Policy Index from Service Lookaside CAM (a.k.a. "BSI").

6-bit Packet Tags	6-bit Message Tags	64-bit Packet Data				
SOM	COM	8	xTCB	Proto	Src IF	Address
SPM	NOP	tlabel	Service P	olicy	Reserved	Server Index
SHM	NOP		Reserved GenCnt		History	Pointer
EOM	NOP	1	Dest IP Addres	ss	Src Port #	Dest Port #

Service Policy is a 22-bit quantity;

Bit number 57 in the upper SPM Reserved Field is used to indicate the client flag; tlabel is a 6-bit Transaction Label to be returned to Pakman upon completion of COM; All other Data fields are aligned on 8-bit boundaries as indicated by the | marks.

Marker Packet Queue Tags Summary

Encoding	Bits	Description	
SOM	6	Start Of Marker Packet: &TCB + Protocol + Src IP Address	
SPM	6	Service Policy Marker: Client Flag + 22-bit Service Policy + 16 b Server Index.	
SHM	6	Service History Marker: 32-bit Reserved Field + 32-bit History Poi	
EOM	6	End of Marker Packet: Dest IP Address + Src and Dest Ports	
COM	6	Command: Options appear in table 5-2 below; usually DELete.	
NOP	6	Logic 0; Reserved; Ignore Packet Data and Message Tags	

Marker Packet Queue COM Options Summary

Encoding	Bits	Description
ADD	6	Associate the &xTCB with the 5-tuple Key; and return the transaction label back to Pakman.
DEL	6	Delete the association of the 5 Juple Key. (&xTCB not required) Return the transaction label back-to-Pakman.
PASS	6	Send Delete Datagram to PE, But do not change state of BLT CAM's.
NOP	6	Logic 0; Reserved
